PROFILE

I possess excellent analytical skills and a passion for ensuring software quality, making me an ideal candidate for a SE Trainee position. I am also well-versed in Agile methodologies and have experience working in an Agile team environment. Through my academic studies, I have developed effective communication and collaboration skills, making me a valuable asset to any team.

EDUCATION

BSc.(Hons) in Information Technology Specializing in Information Technology - (SLIIT)

🎓 3rd Year Undergraduate

📅 February 2021 - December 2024

PROJECTS

🔗 Online Electronic Application Marketing Management System

Academic Project

📅 July 2022 - November 2022

- This Electronic applicant marketing management system is a web-based application that handles eight sections of the company, including Customer, Finance, HR, Sales, Stock, Service, Supplier and Purches management.
- Developed in MERN stack.

🔗 Wild Life Safari Management System

Academic Project

📅 August 2021 - October 2021

- This was our second semester project, where we developed a simple website for users who intend to go to a wildlife safari to spend their vacation. There are varieties of packages for customers to choose from, based on their preferences and affordability. This also has an attractive GUI, grabbing the attention of the users.
- Technologies - HTML, CSS, JavaScript, php, Apache, phpMyAdmin

VOLUNTEER

🔗 STEMUP Educational Foundation

Volunteer

- Volunteered with STEMup Foundation to promote STEM education in Sri Lanka through programs like CoderDojo.
- Helped younger community members develop skills in coding, robotics, and related fields.
- Contributed to a more technologically advanced future for Sri Lanka and found the experience fulfilling.
